

DATE: March 7, 2016

SUBMITTED BY: Odie Wheeler, Public Works Director

PREPARED BY: Brent R. Jett, Engineer

SUBJECT: Long Wharf Park Greening

RECOMMENDATION:

That the Council award contract for construction of the greening improvements at Long Wharf Park to Metro Paving Corp, of Hyattsville, MD in the amount of \$349,560.

DISCUSSION:

The parking lot will be improved removing some of the perimeter hardscape areas. This will provide stormwater management where none existed previously. In addition, the pedestrian walkways will be improved and a section of new parking spaces that will consist of pervious pavers will be installed along the west side. Water quality from the parking and a portion of the drive area will be improved with this greening project. A copy of the site plan is attached. This plan has been reviewed by the Long Wharf Advisory Committee for which they support.

FISCAL IMPACT:

Metro Paving has agreed to honor the same unit pricing that was quoted when they were awarded (lower bidder) the Maryland Ave. Green Street project. The funding for this project is solely from a grant awarded to the City of Cambridge from the Chesapeake Bay Trust for which they have given their approval to award the construction contract to Metro Paving.
